Nippon India Mutual Fund
Wealth sets you free

Systematic Investment Plan

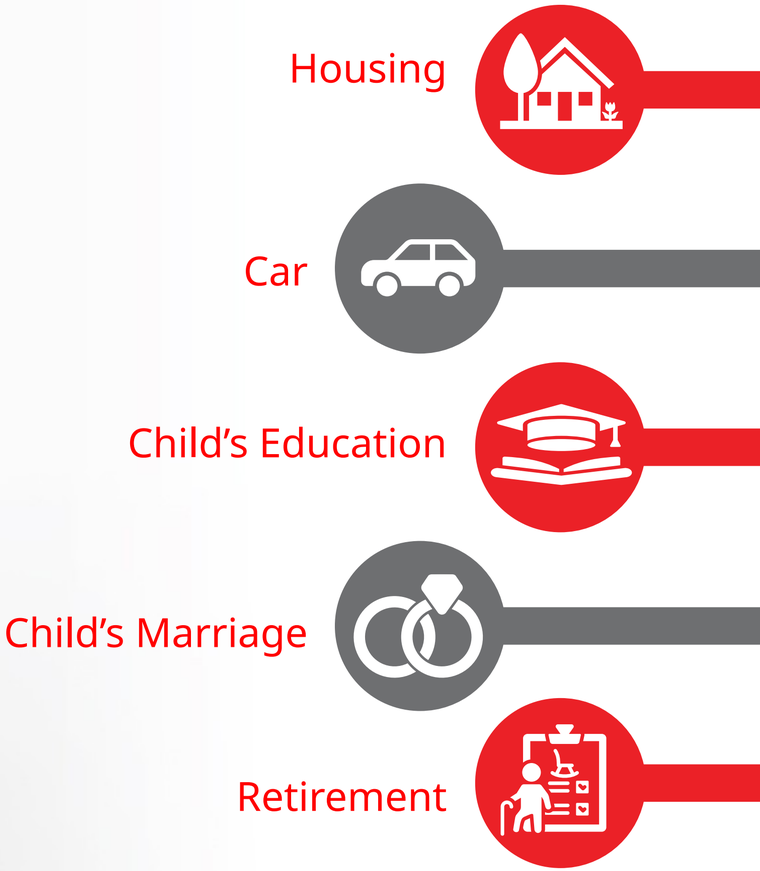

Discipline today, Financial Freedom tomorrow

Good gets better

Life is a series of financial milestones...

Every stage of life brings financial milestones
And planning ahead makes them easier to achieve.

Why financial goals need strategic planning

- Time Bound & Cost Specific
- The Inflation Factor
- Peace of Mind

Wondering how to invest regularly and achieve your financial goals?

SIP

is your answer!!

Nippon India Mutual Fund
Wealth sets you free

What is a Systematic Investment Plan (SIP)?

Invest a fixed amount at regular intervals- monthly, weekly, or as per your convenience.

Fixed & Regular

Set it once and your investments run on autopilot. No need to remember or time the market.

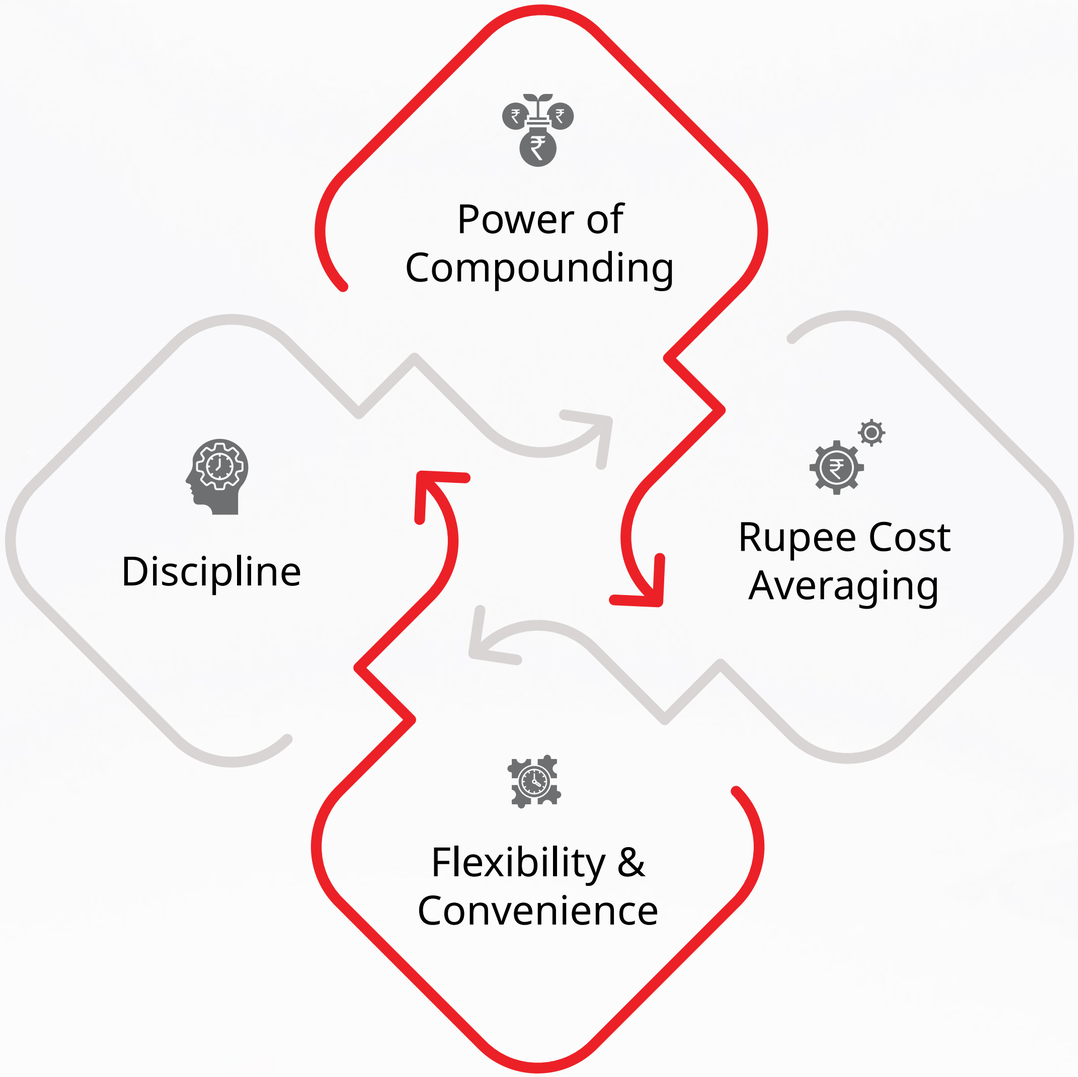

Automatic & Hassle-Free

Designed to help you build wealth steadily and achieve financial goals.

Goal-Oriented & Long Term

Benefits of investing via SIP

The Power of Compounding

SIP of Rs 10,000 per month					
	Amount invested (Rs lakhs)	Investment Value (Rs lakhs)			
		8%	10%	12%	15%
5 years	6	7.34	7.72	8.11	8.73
10 years	12	18.13	20.15	22.40	26.30
15 years	18	33.98	40.16	47.59	61.64
20 years	24	57.27	72.40	91.99	132.71

Note: The above table is only for illustration purpose

Starting early and staying invested for long helps to reap the Power of Compounding in SIPs

The Power of Compounding through Early Investing

₹5.51 Crore

Mayank: Started at 25
Monthly SIP of ₹10,000 till age 60
at @ 12% returns.

₹3.08 Crore

Sana: Started at 30
Monthly SIP of ₹10,000 till age 60
at @ 12% returns.

5 years

The time difference
Just 5 years of extra compounding
nearly doubled the wealth!!

- Time is the most powerful driver of long-term investing.
- Every year of delay significantly reduces the impact of compounding.
- The best time to start was yesterday; the second best time is today.

Rupee Cost Averaging

Markets don’t move in a straight line- they go up and down.

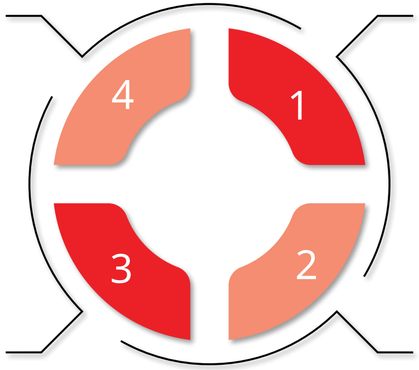

Investing a fixed amount regularly helps to

- “Buy more units at Lower price”
- “Buy lower units at Higher price”

thereby resulting in rupee cost averaging and eliminating the need to time the markets.
Over time, the average cost per unit becomes highly efficient, giving you more units during market corrections and protecting you during the peaks.

Result
Average Cost : ₹70.59/unit across all purchases.

Market High
₹10,000 buys 100 units at ₹100/unit.

Market Recovery
₹10,000 buys 125 units at ₹80/unit.

Market Dip
₹10,000 buys 200 units at ₹50/unit.

Rupee Cost Averaging

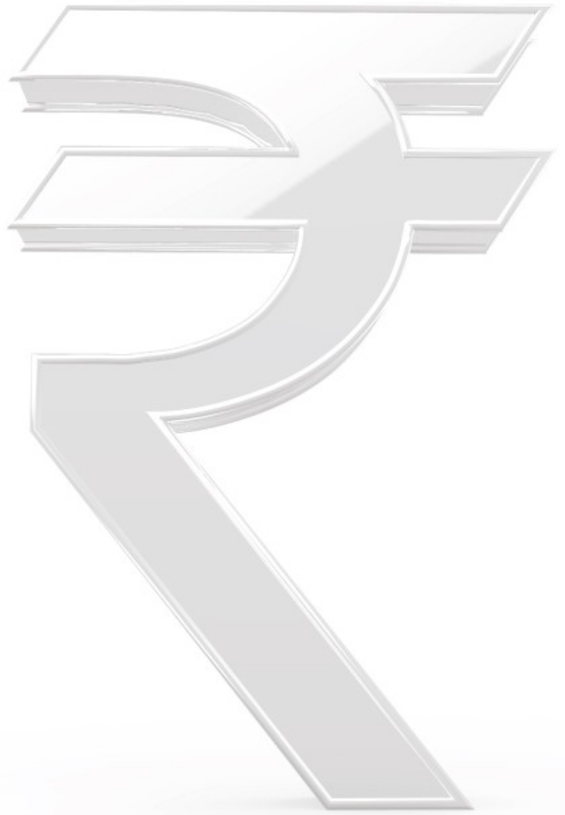

Option 1- Simple Average NAV
Buying units worth ₹1,00,000 at the average NAV over 10 months, accumulating 8503.980 units @ simple average NAV of ₹11.7592.

Option 2- Actual Average NAV
Buying units worth ₹10,000 at the prevailing NAV in each of the 10 months. Over time you accumulate 8516.415 units @ actual average NAV of ₹11.7420.

Month	SIP amount (Rs)	NAV (Rs)	Units bought
1	10,000	11.0000	909.091
2	10,000	11.8800	841.751
3	10,000	12.4740	801.667
4	10,000	11.8503	843.860
5	10,000	11.2578	888.274
6	10,000	11.3704	879.479
7	10,000	11.5978	862.235
8	10,000	12.1777	821.176
9	10,000	12.2994	813.045
10	10,000	11.6845	855.837

11.7592 < 11.7420

Simple Average NAV Actual Average NAV

Power of Discipline

Meet Ananya:

The disciplined investor

Meet Sahil:

The market timer

Particulars	Ananya- SIP Investor	Sahil- Market Timer
Investment Pattern	₹10,000 Monthly SIP	₹1,20,000 once every year
Investment Behaviour	Consistent & Disciplined	Attempts to time markets
Effective Annual Return	12%	8%
Total Amount Invested	₹12,00,000	₹12,00,000
Tenure (Years)	10	10
Portfolio Value	₹23,23,391	₹18,77,458

Discipline builds wealth, Hesitation delays growth

Flexibility & Convenience

Start Small
Begin with as little as ₹100/₹500 per month

Anytime SIP
Select any date between the 1st and 28th of the month to begin your SIP. Life happens on different schedules, now your SIP can too.

Pause SIP
Temporarily pause SIPs during financial emergencies- no penalties.

Modify SIP
Change your SIP amount, date or frequency as financial needs evolve.

Rahul’s Dream: Build a ₹5 crore Retirement Corpus

Meet Rahul

- Age: 30
- Profession: Software Engineer.
- Lifestyle: Lives in Bengaluru, enjoys travel and tech gadgets.

His Retirement Goals

Rahul wants to retire at 60, and plans for a comfortable 30 years post-retirement.

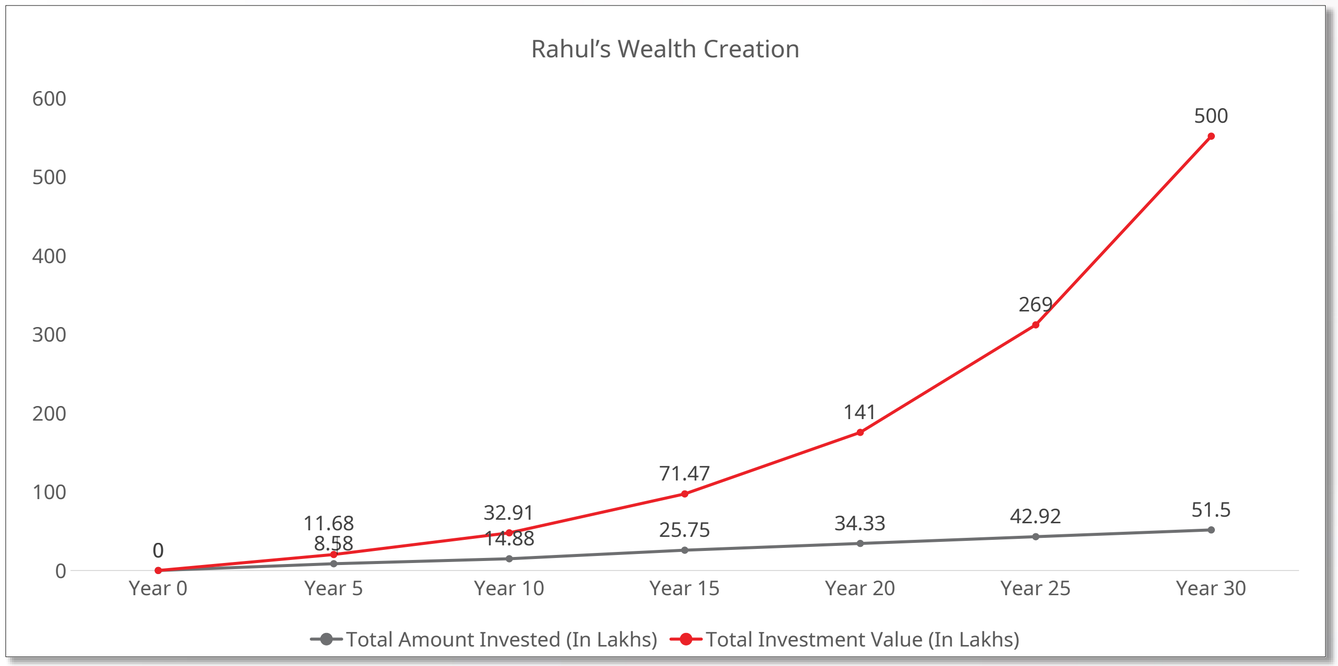

His goal: Build a retirement corpus of ₹5 crore to maintain his lifestyle and fund medical expenses.

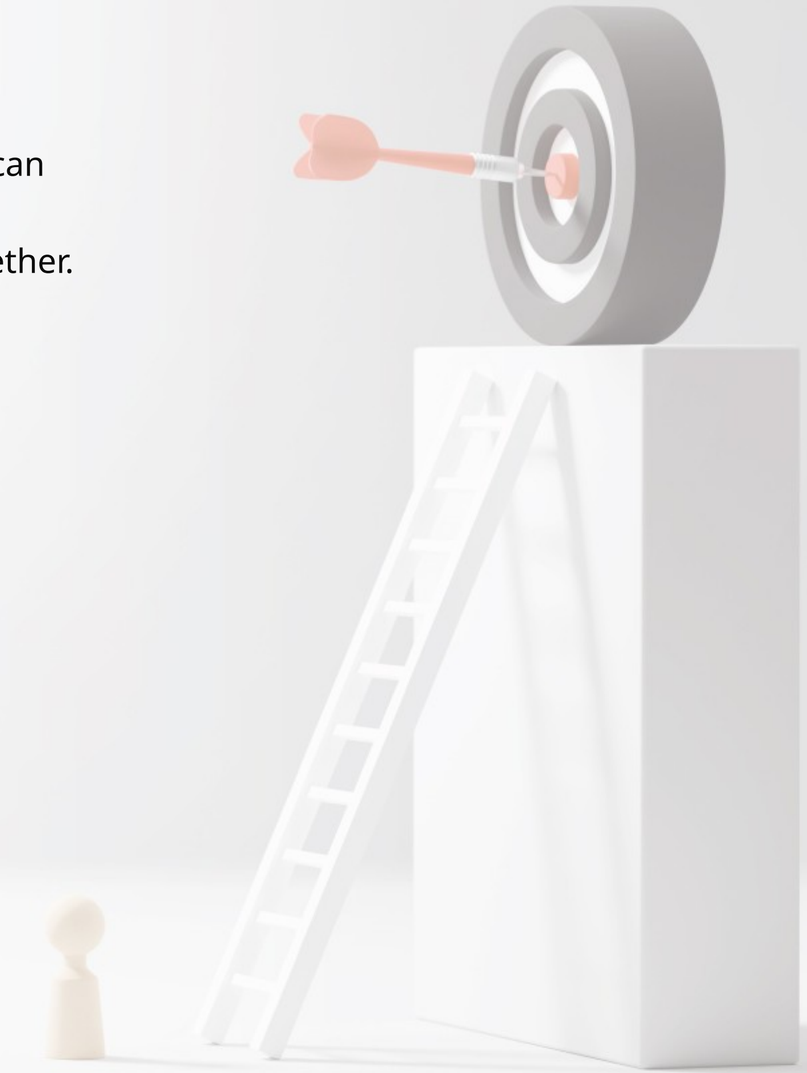

How Rahul can convert his Goal into Reality

The Solution

By investing just ₹14,306 per month, through an SIP, and assuming an annual return of 12%, Rahul can systematically build the ₹5 crore corpus he needs.

See how Rahul's investment grows over 30 years- the power of time and compounding working together.

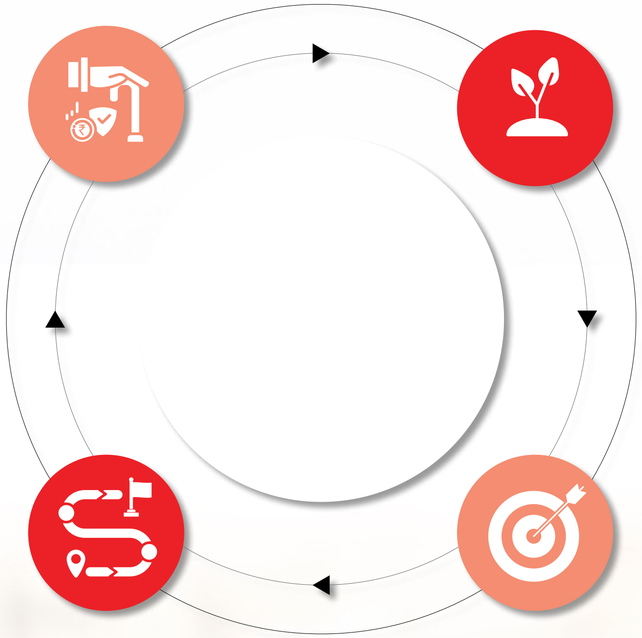

Who should invest via SIP?

Near-Retirement Investors

Age 50s

Investor is on the verge of retirement or already retired. Focus on preserving accumulated wealth and maintaining a satisfactory lifestyle.

First Time Investors

Age 20s

Investor is early in their earning journey with a long investment horizon. Focus on building wealth by inculcating financial planning.

Stability-focused Investors

Age 40s

Investor with a stable career seeks capital protection and steady growth. Their priorities include children's education, retirement planning, etc.

Goal-Driven Investors

Age 30s

Investor is in a high-growth phase of their career, planning for key financial milestones. Focus on structured, goal-based investing.

Features Offered by Nippon India Mutual Fund

Flexible Options, Designed Around Your Life

SIP+

SIP+ is a feature offered by Nippon India Mutual Fund that enables dynamic SIP investing, supported by an in-house proprietary quantitative model.

Dynamic Allocation Logic:

- Bearish Valuations -> Higher allocation to take advantage of potential opportunities.
- Bullish valuations -> Lower allocation to moderation investment exposure.

SIP+

How does it work?

- Investor selects a base SIP amount.
- Monthly investment varies between 0.3x to 3x of the base amount.
- The final SIP amount is determined based on market conditions assessed by the model.

Karan, a salaried professional, chooses to begin SIP+ with a base SIP amount of ₹10,000 per month

Market Condition	Model View	SIP+ Multiplier	Monthly Investment (₹)
Market at elevated levels	Cautious	0.5x	5,000
Market fairly valued	Neutral	1.0x	10,000
Market moderately attractive	Positive	1.5x	15,000
Markets highly attractive	Opportunistic	2.5x	25,000

Flex SIP

What is a Flex SIP?

- It is a Facility where the investment is based on a target value approach for achieving specific goals.
- When markets decline the SIP is topped up to maintain the investment value or keep the same value till target value is achieved.

Benefits of a Flex SIP

- Takes advantages of market volatility
- Opportunity to accumulate more units compared to a normal SIP

How does a Flex SIP work?

Investor selects a base SIP amount

Monthly investment varies between 0.3x to 3x of the base amount

The final SIP amount is determined based on market conditions assessed by the model.

Flex SIP

Final installment amount.

- The final SIP amount is variable and subject to an upper cap. It is debited automatically as per the registered mandate.

Investor sets the Base SIP amount

- The Investor selects a base SIP amount (eg: ₹10,000 per month).
- A One-Time Bank Mandate (OBTM) is registered with a limit sufficient to allow higher debits if required.

Formula based adjustment

- A pre-defined calculation formula is applied to the base SIP amount.
- Based on market conditions, investment amount may be increased or decreased.

Market level assessment

- Prior to SIP installment date, the Flex SIP mechanism evaluates prevailing market levels.

Step Up SIP

Growing your investment over time

What is a Step Up SIP?

- Allows investors to increase their SIP amount at regular intervals.
- It helps match your rising income and inflation, ensuring your investments grow with your financial capacity, enabling you to build a significantly larger corpus over time.

What is a Top Up SIP?

- Allows investors to make a one-time additional investment over and above the regular SIP amount whenever they have surplus funds.
- Offers the flexibility to invest extra when you have surplus money, without committing to a permanent increase in the SIP amount.

How does a Step Up SIP work?

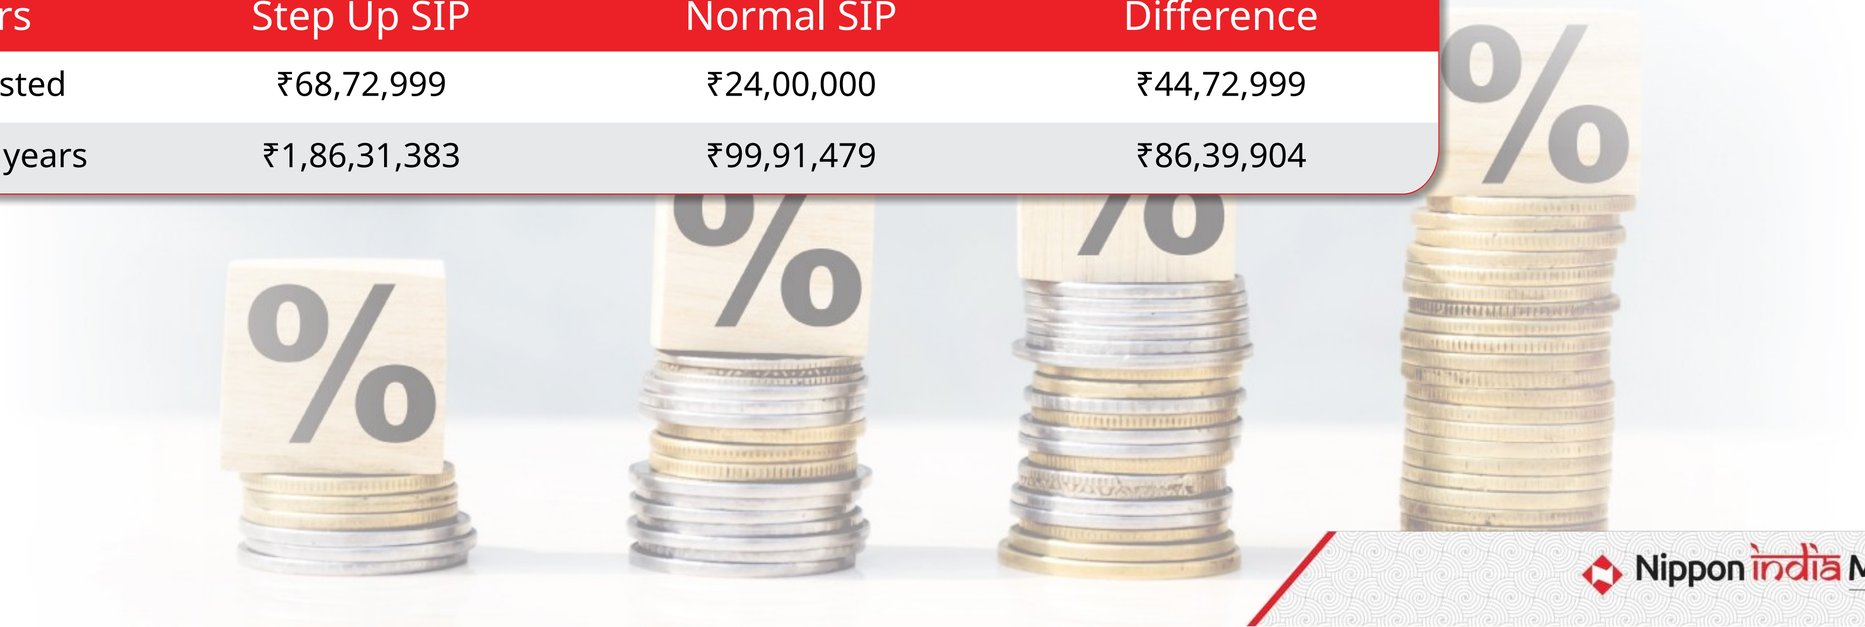

Investor selects an initial SIP amount

Investors define the step up amount (eg: ₹500), frequency (annual/quarterly) and final amount target

SIP amount increases stepwise at chosen intervals and once your final amount is reached, SIP continues at that level.

Monthly SIP investment of Rs 10,000 per month invested with 10% Step-Up or increase every year over a 20-year period @12% returns.

Particulars	Step Up SIP	Normal SIP	Difference
Amount Invested	₹68,72,999	₹24,00,000	₹44,72,999
Value After 10 years	₹1,86,31,383	₹99,91,479	₹86,39,904
