# Changing Landscape of Indian Real Estate Market

**Pre 2016 Era**

- Weak regulation, fragmented market
- Project delays, speculative demand, NBFC driven funding

Takeaway: Investor-led, opaque market

**2016 & 2017 — Liquidity stress of NBFCs**

- Asset Liability mismatch (ALM), Quality issues in NBFC's
- Reduced liquidity to developers due to NBFC absence

Takeaway: From easy money to disciplined financing

**2018 — Reforms**

- RERA, Demonetisation, GST, Benami Transaction Amendment Act, Insolvency & Bankruptcy Code (IBC)
- Escrow norms, higher accountability, capital discipline

Takeaway: Short-term stress, long-term stability

**2020 — Post COVID-19**

- COVID-19 pandemic led to disruption in 2020
- Consolidation in the real estate market

Takeaway: End-user demand becomes core driver

**2020 Onwards**

- Strong resurgence in residential market
- Improved regulatory governance, transparency & credit culture

Takeaway: Sustainable, institutionally investible market

# Investment Approach – Strategy & Asset Management

- Type of Investments:
  - Structured Debt investments by way of Senior Secured Non Convertible Debentures up to 5 year tenure with focus on primarily residential and very selectively commercial projects under development stage in top 6 cities (MMR, NCR, Bengaluru, Pune, Chennai and Hyderabad)
- Target Projects:
  - Majorly Mid-Market Housing constituting bulk of the market. Avoid ultra affordable and super luxury
  - Self liquidating residential projects, easy to execute with relatively shorter gestation (timespan of ~3-5 yrs)
  - Preferably located in the suburban / peripheral area and urban centers with housing deficit and burgeoning population
  - Substantial security / cash flow cover ~2x
  - Judicious blend of projects at different stages of life cycle of the project with visibility on cash flows
    - Brown field projects / Early Stage with initial approvals, where sales have commenced or shortly commencing
    - Mid / advanced stage under construction projects
    - Selectively Land stage (but no land aggregation risk) on an opportunistic basis with relatively more established developers
- Type of Developers:
  - Deal with established Real Estate Developers with track record of execution across market cycles
  - Deal with Developers dominant in particular geography
- Endeavor to secure its investments by multi layered security deterrent mechanism which may include:
  - Charge on underlying asset (land, building, receivables and/or units in a project)
  - Escrow mechanism for capturing / trapping cashflows from the projects
  - Additional collateral, wherever required /applicable
  - Personal and corporate guarantees, wherever possible
  - Strong EOD (event of default) clauses & veto rights, wherever possible
  - Control on costs, selling price and exit covenants, affirmative rights on key matters as appropriate
  - Share pledge of Issuer entity, wherever applicable
- Active Real Estate Asset Management* - Intensive monitoring and control of:
  - Collection, costs and sales proceeds through escrow account
  - Construction progress by independent agencies, as appropriate
  - Appointment of 3rd party agencies as appropriate

# Real Estate Developer Landscape

- **Large Listed names** offer stability but limited upside.
- **Emerging and local players** present yield opportunities with manageable risk-ideal for selective exposure.
- **New developers** may offer high returns but with high risk and limited track record

# Real Estate Development/Project Flow

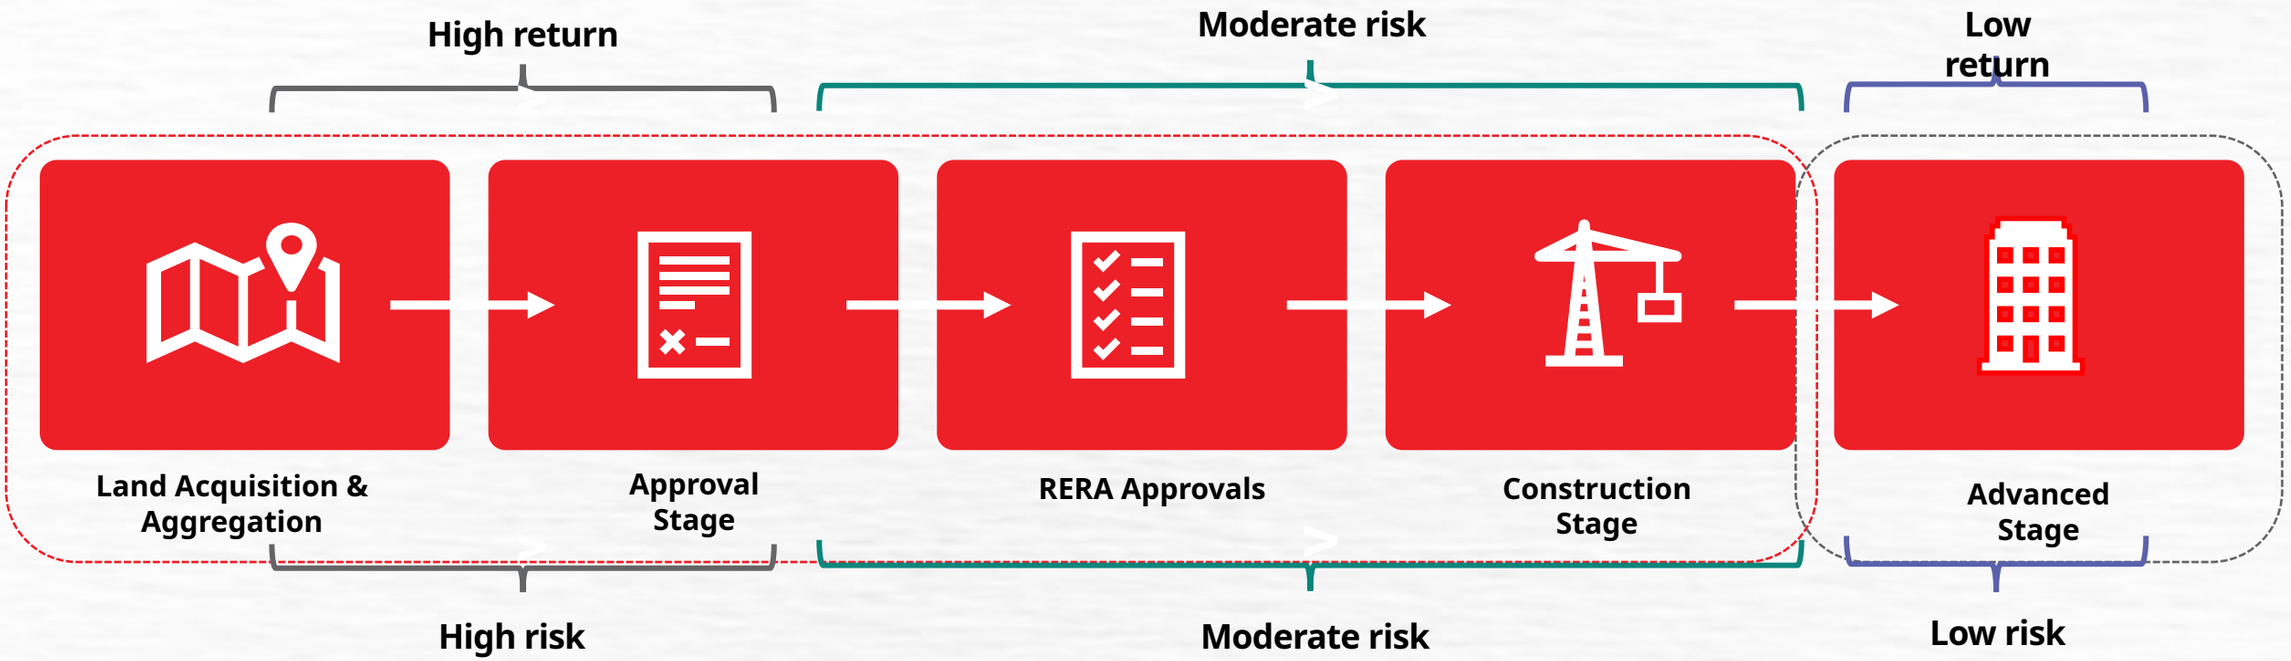

Banks do not finance pre-construction projects, so developers turn to AIFs or raise money directly by issuing NCDs. These are key alternative financing routes at early stages.

These stages are typically funded by banks i.e., from mid-construction to near completion. Developers too prefer bank funding at this stage due to lower interest costs.

# Investment Philosophy: Quantitative Framework

## Strategy - Bottom-up Approach

- High focus on fundamental analysis and research
- Improvement in earnings as the Indian landscape provides ample investment opportunities
- Identify stocks most attractively valued with respect to business model, financial metrics, and quality of management

## Risk-Reward

- Adequate diversification across Nifty 500 companies, across sectors, and across market cap
- Active approach towards stock selection, with no single stock above 10% and no sector over 30%

*As per AMFI market capitalization

Research-driven, bottom-up stock selection with sectoral diversification ensures prudent risk-managed investing

# Investment Process

## 1 Screen

Stock identification relies on fundamental research:

- Future prospects evaluation
- Stakeholder interactions (companies, competitors, customers, suppliers, distributors)
- Management & governance quality assessment
- Financial modeling with growth projections
- External research reports review

## 2 Analyze

Identify fairly valued stocks through valuation gap analysis:

- Historical Vs Current valuations
- Peer Group Valuation
- Potential Rerating Triggers

## 3 Construct

Build a balanced portfolio based on risk & time-adjusted returns, with weights influenced by multiple factors

- Company valuation
- Peer comparison
- Macro & microeconomic impact
- Stock liquidity

## 4 Manage

- Monitor holdings regularly
- Maintain buy/sell discipline
- Rebalance for risk, quality & goals
