Wealth sets you free

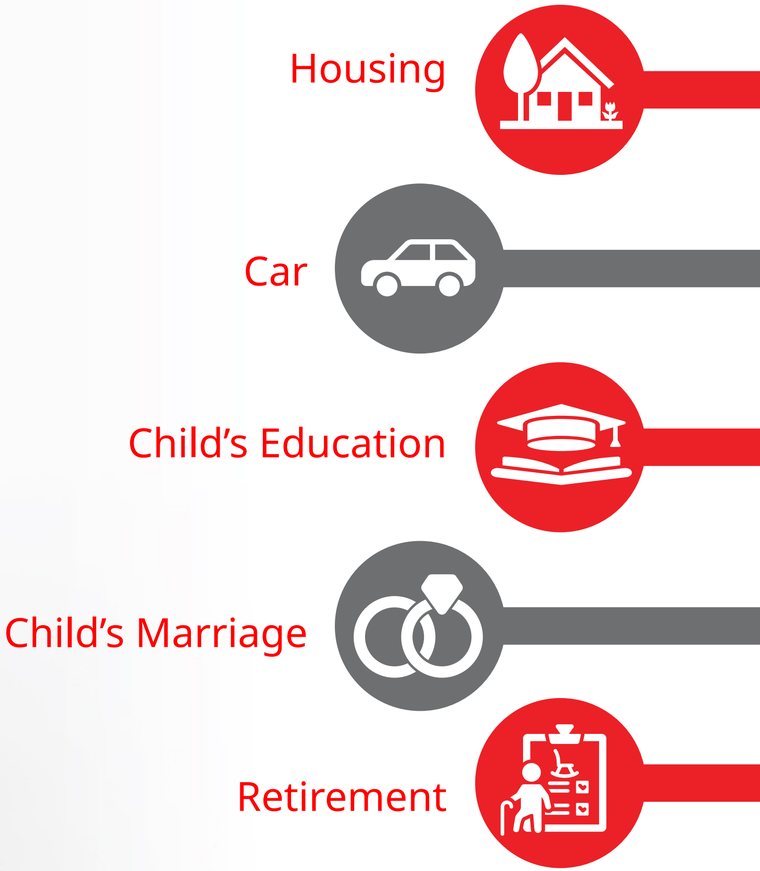

Systematic Investment Plan

Discipline today supports long-term financial stability

Life is a series of financial milestones...

Every stage of life brings financial milestones
And planning ahead may help to achieve them.

Why financial goals need strategic planning

- Time Bound & Cost Specific
- The Inflation Factor
- Financial Stability

Wondering how to invest regularly and achieve your financial goals?

SIP

(Systematic Investment Plan)

Might be your answer!!

Nippon India Mutual Fund

Wealth sets you free

What is a Systematic Investment Plan (SIP)?

Invest a fixed amount at regular intervals- monthly, weekly, or as per your convenience.

Fixed & Regular

Set it once and your investments run on autopilot. No need to remember or time the market.

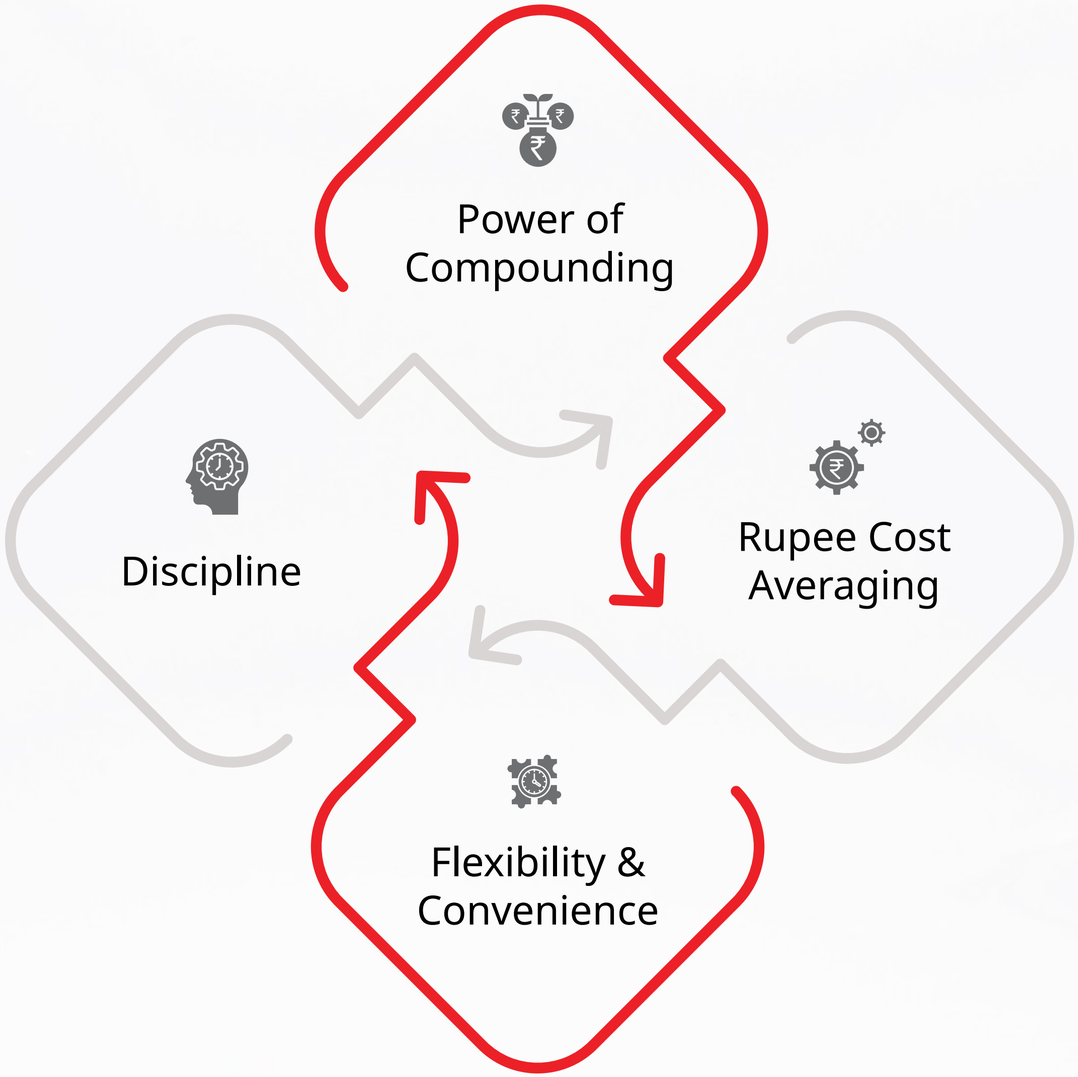

Automatic & Hassle-Free

Designed to help you build potential wealth and potentially achieve financial goals.

Goal-Oriented & Long Term

Benefits of investing via SIP

The Power of Compounding

SIP of Rs 10,000 per month					
	Amount invested (Rs lakhs)	Investment Value (Rs lakhs)			
		6%	8%	10%	12%
5 years	6	6.98	7.34	7.72	8.11
10 years	12	16.33	18.13	20.15	22.40
15 years	18	28.83	33.98	40.16	47.59
20 years	24	45.56	57.27	72.40	91.99

Note: The above table is only for illustration purpose

Starting early and staying invested for long helps to reap the Power of Compounding in SIPs

Disclaimer: The above information is for illustration purposes only. The calculations are based on an assumed rate of return and actual results may vary depending on various factors involved in capital market. The examples do not purport to represent the performance of any security or investments. Given the individual nature of tax consequences, each investor is advised to consult his/her professional tax/financial advisor before making any investment decision.

The Power of Compounding through Early Investing

₹5.51 Crore

Mayank: Started at 25
Monthly SIP of ₹10,000 till age 60
at @ 12% returns.

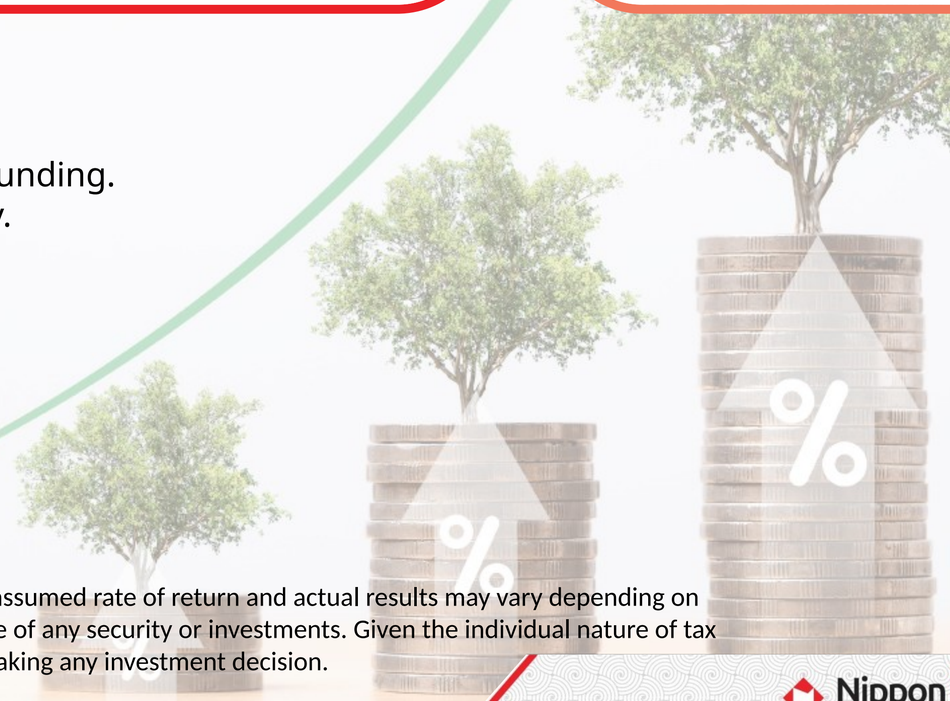

₹3.08 Crore

Sana: Started at 30
Monthly SIP of ₹10,000 till age 60
at @ 12% returns.

5 years

The time difference
Just 5 years of extra compounding
led to a materially higher corpus!!

- Time is the most powerful driver of long-term investing.
- Every year of delay may significantly reduces the impact of compounding.
- The best time to start was yesterday; the second best time is today.

Disclaimer: The above information is for illustration purposes only. The calculations are based on an assumed rate of return and actual results may vary depending on various factors involved in capital market. The examples do not purport to represent the performance of any security or investments. Given the individual nature of tax consequences, each investor is advised to consult his/her professional tax/financial advisor before making any investment decision.

Rupee Cost Averaging

Markets don’t move in a straight line- they may go up and down.

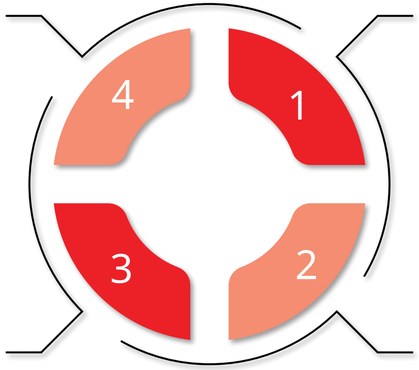

Investing a fixed amount regularly helps to

- “Buy more units at Lower price”
- “Buy lower units at Higher price”

thereby resulting in rupee cost averaging and eliminating the need to time the markets.
Over time, the average cost per unit becomes highly efficient, giving you more units during market corrections and helping manage the impact during during the peaks.

Result
Average Cost : ₹70.59/unit across all purchases.

Market High
₹10,000 buys 100 units at ₹100/unit.

Market Recovery
₹10,000 buys 125 units at ₹80/unit.

Market Dip
₹10,000 buys 200 units at ₹50/unit.

Disclaimer: The above information is for illustration purposes only. The calculations are based on an assumed rate of return and actual results may vary depending on various factors involved in capital market. The examples do not purport to represent the performance of any security or investments. Given the individual nature of tax consequences, each investor is advised to consult his/her professional tax/financial advisor before making any investment decision.

Rupee Cost Averaging

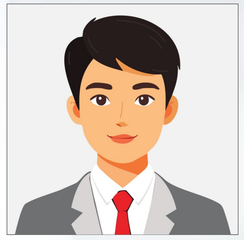

SIP Rupee Cost Averaging					
		SIP Investor		Lumpsum Investor	
Month	NAV (Rs)	SIP amount (Rs)	Units Purchased	Investment	Units Purchased
1	50	10,000	200	1,00,000	2000
2	48	10,000	208.33		
3	46	10,000	217.39		
4	42	10,000	238.09		
5	45	10,000	222.22		
6	46	10,000	217.39		
7	48	10,000	208.33		
8	50	10,000	200		
9	51	10,000	196.08		
10	52	10,000	192.31		
Total Investment		₹1,00,000		₹1,00,000	
Total Units Purchased		2100.14		2000	
Average Unit Price		47.80		50	
Value after 10 months		1,09,207.28		1,04,000	

Over the 10 months, you may accumulate more units (2,100.14>2,000) at a lower average cost (47.80<50) as an SIP investor, resulting in a higher portfolio value.
By investing regularly across market fluctuations, the SIP approach benefited from rupee cost averaging.
The above information is for illustration purposes only.

Why Starting Early always Wins in Investing

Both Wish to Retire At 55

25 years	SIP Starting Age	35 years
15,000	SIP Amount	20,000
30 years	SIP Duration	20 years
4.62 Cr	Total Corpus	1.83 Cr

Rate of Return @ 12%

Start Your SIP Early

Nippon India Mutual Fund
Wealth sets you free

Flexibility & Convenience

Start Small
Begin with as little as ₹100/₹500 per month

Anytime SIP
Select any date between the 1st and 31st of the month to begin your SIP. Life happens on different schedules, now your SIP can too.

Pause SIP
SIPs may be paused temporarily during financial emergencies- no penalties.

Modify SIP
Change your SIP amount, date or frequency as financial needs evolve.

Rahul’s Dream: Build a ₹5 crore Retirement Corpus

Meet Rahul

- Age: 30
- Profession: Software Engineer.
- Lifestyle: Lives in Bengaluru, enjoys travel and tech gadgets.

His Retirement Goals

Rahul wants to retire at 60, and plans for a comfortable 30 years post-retirement.

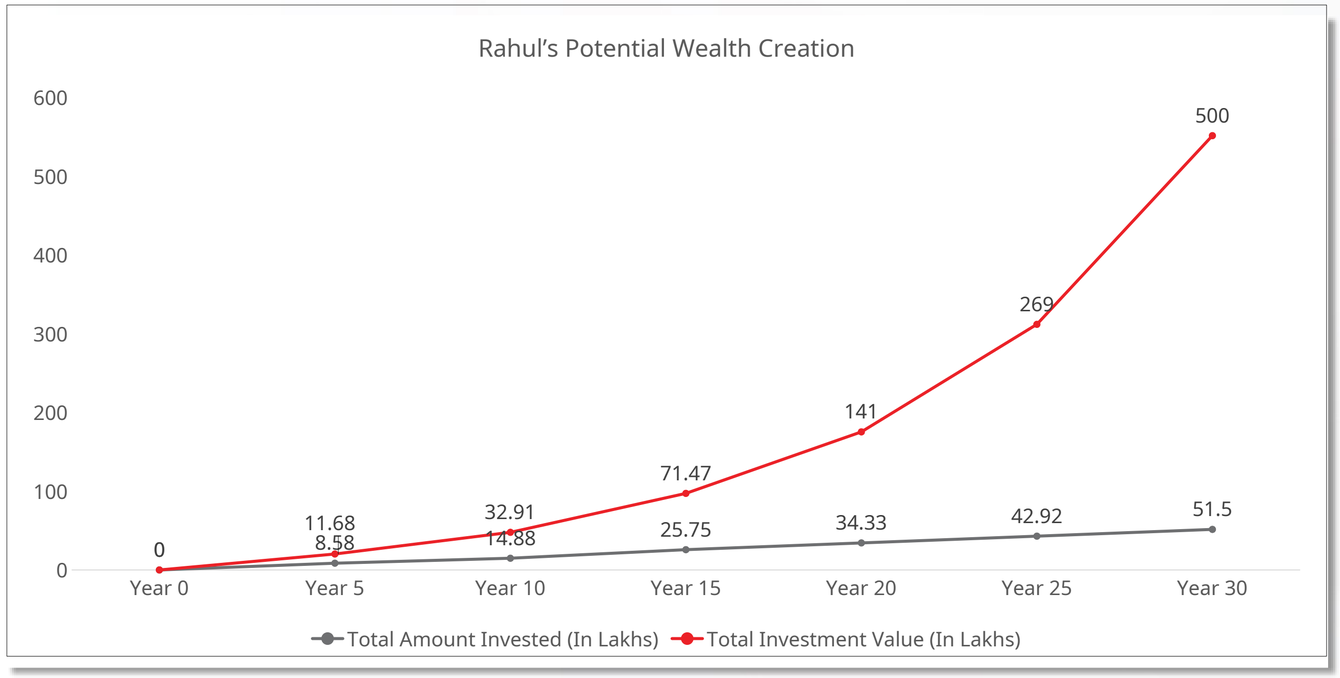

His goal: Build a retirement corpus of ₹5 crore to maintain his lifestyle and fund medical expenses.

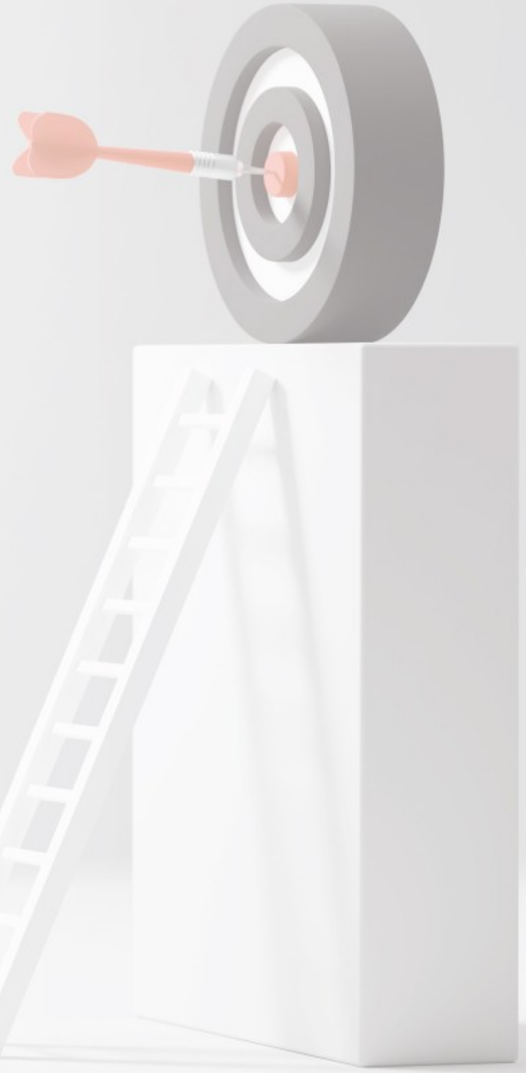

How Rahul could convert his Goal into Reality

The Solution

By investing just ₹14,306 per month, through an SIP, and assuming an annual return of 12%, Rahul could potentially build the ₹5 crore corpus he needs.

See how Rahul's investment grows over 30 years- the power of time and compounding working together.

Goal-Driven Investors

Age 30s

Investor is in a high-growth phase of their career, planning for key financial milestones. Focus on structured, goal-based investing.

Features Offered by Nippon India Mutual Fund

SIP+

SIP+ is a feature offered by Nippon India Mutual Fund that enables dynamic SIP investing, supported by an in-house proprietary quantitative model.

Dynamic Allocation Logic:

- Bearish Valuations -> Higher allocation to take advantage of potential opportunities.
- Bullish valuations -> Lower allocation to moderation investment exposure.

SIP+

How does it work?

- Investor selects a base SIP amount.
- Monthly investment varies between 0.3x to 3x of the base amount.
- The final SIP amount is determined based on market conditions assessed by the model.

Karan, a salaried professional, chooses to begin SIP+ with a base SIP amount of ₹10,000 per month

Market Condition	Model View	SIP+ Multiplier	Monthly Investment (₹)
Market at elevated levels	Cautious	0.5x	5,000
Market fairly valued	Neutral	1.0x	10,000
Market moderately attractive	Positive	1.5x	15,000
Markets highly attractive	Opportunistic	2.5x	25,000

Disclaimer - This is only an optional facility, it does not assure better performance. Past performance of the model does not guarantee future results.

Flex SIP

What is a Flex SIP?

- It is a Facility where the investment is based on a target value approach for achieving specific goals.
- When markets decline the SIP is topped up to maintain the investment value or keep the same value till target value is achieved.

Benefits of a Flex SIP

- Takes advantages of market volatility
- Opportunity to accumulate more units compared to a normal SIP

How does a Flex SIP work?

Investor selects a base SIP amount

Monthly investment may increase up to 2x the base amount.

The final SIP amount is determined based on market value.

Flex SIP

Final installment amount.

- The final SIP amount will be increased subject to an upper cap of twice the SIP amount. It is determined based on the market value of the scheme on T-5 days from the SIP due date.

Investor sets the Base SIP amount

- The Investor selects a base SIP amount (eg: ₹10,000 per month).
- A One-Time Bank Mandate (OBTM) is registered with a minimum limit twice the SIP amount to allow higher debits if required.

Formula based adjustment

- A pre-defined calculation formula is applied to the base SIP amount.
- Based on market conditions, investment amount may be increased.

Market level assessment

- Prior to SIP installment date, the Flex SIP mechanism evaluates prevailing market levels.

Disclaimer - This is only an optional facility, it does not assure better performance. Past performance of the model does not guarantee future results.

Step Up SIP

Growing your investment over time

What is a Step Up SIP?

- Allows investors to increase their SIP amount at regular intervals.
- It helps match your rising income and inflation, ensuring your investments grow with your financial capacity, enabling you to build a significantly larger corpus over time.

How does a Step Up SIP work?

Investor selects an initial SIP amount

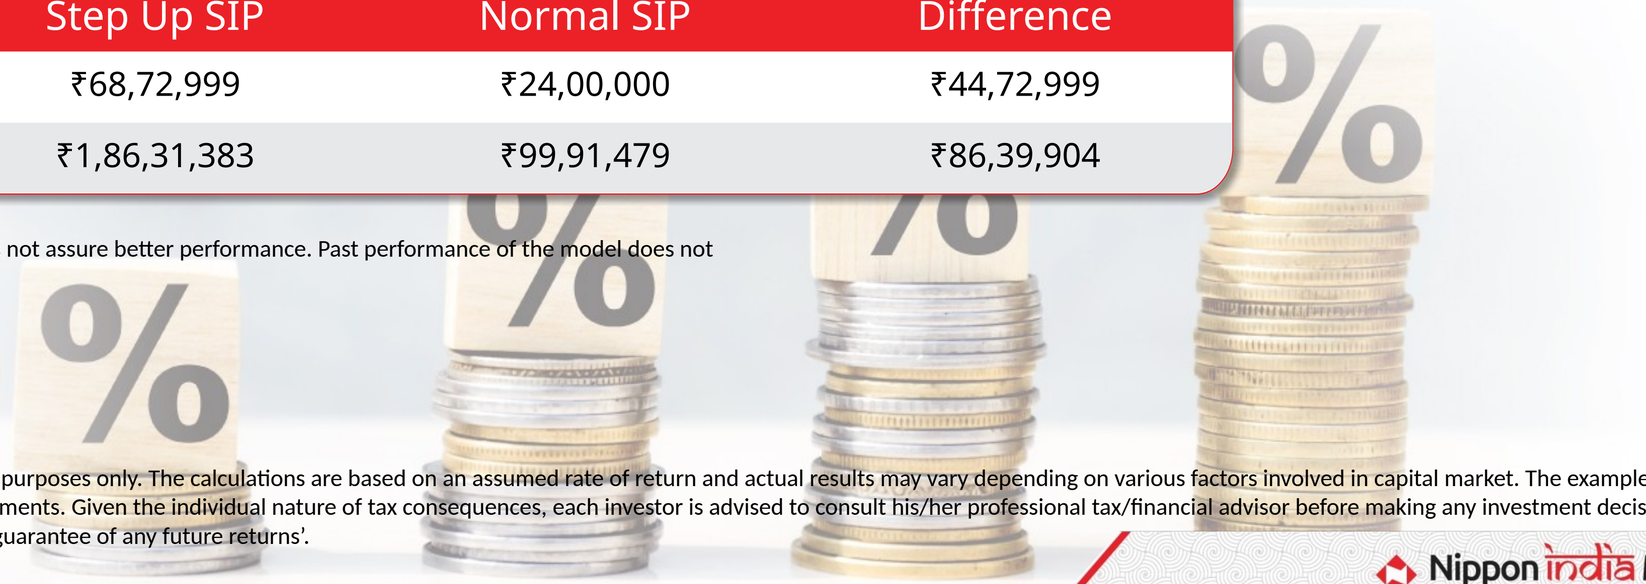

Investors define the step up amount (eg: ₹500), frequency (annual/half yearly) and number of times to be increased.

SIP amount increases stepwise at chosen intervals and chosen number of times. Once your final amount is reached, SIP continues at that level.

Monthly SIP investment of Rs 10,000 per month invested with 10% Step-Up or increase every year over a 20-year period @12% returns.

Particulars	Step Up SIP	Normal SIP	Difference
Amount Invested	₹68,72,999	₹24,00,000	₹44,72,999
Value After 10 years	₹1,86,31,383	₹99,91,479	₹86,39,904

Disclaimer - This is only an optional facility, it does not assure better performance. Past performance of the model does not guarantee future results.

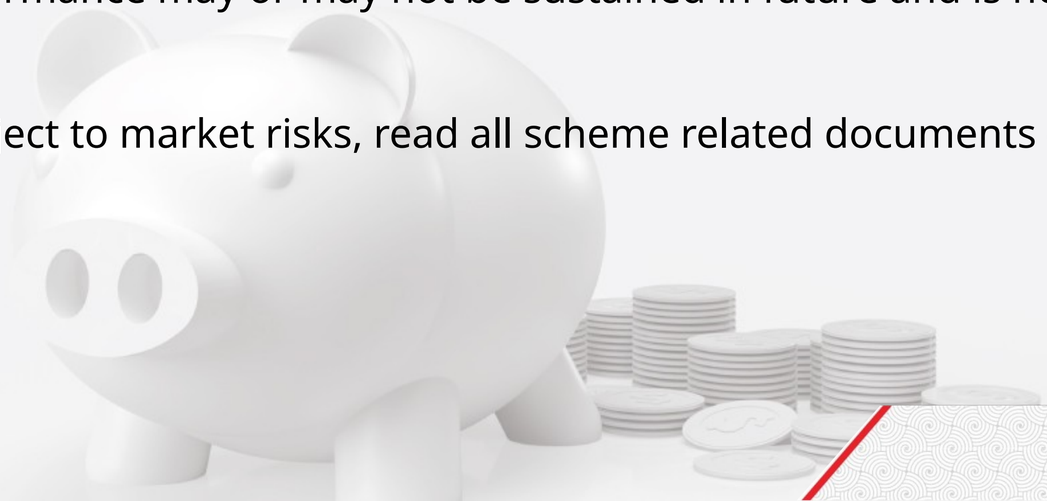

Disclaimer: The above information is for illustration purposes only. The calculations are based on an assumed rate of return and actual results may vary depending on various factors involved in capital market.
